

FEATURES & BENEFITS

exofin[®]

MASTIC

- Maximum performance adhesive that adds additional holding strength to surgical tapes, dressings, and bandages
- Non-water soluble protection and gentle on all skin types
- Reduces healthcare costs by reducing dressing changes
- exofin[®] Mastic increases the holding power of dressings and catheters, guarding against unintended removal of the device
- exofin[®] Mastic is available in easy to use EtO sterilized vials with proprietary protective coating that guards against unintentional piercing of surgical gloves while applying
- exofin[®] Mastic is proven to have additional holding power versus tape application alone
- Available in multiple package and applicator options for every use*
- exofin[®] Mastic is CHG compatible

*Sterile packaging only available in single-use vials
